CA Building Code & Sustainability Updates

Recent Title 24 and LEED changes are driving changes in how we design, build and operate buildings. This affects both our building systems and how team members communicate and collaborate. This seminar will focus on specific changes driving design, construction, commissioning and operations of buildings, and how early involvement and a proactive approach by the entire team facilitates achievement of code requirements and sustainability goals.

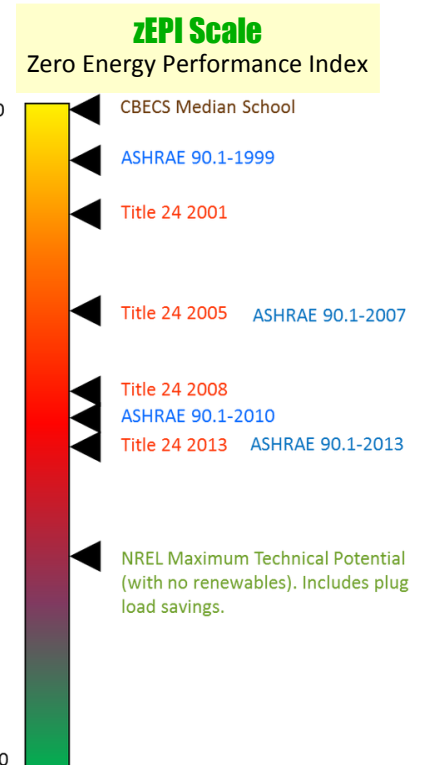

- Topics:**
- Building Commissioning Update
 - Title 24 Code Requirements
 - LEED v4 Requirements
 - Project Team Member Responsibilities
 - Team Collaboration Lessons Learned

Presenters, from 3QC, Inc:

Jim Ogden, LEED Fellow, has 30 years' experience designing, managing and commissioning buildings. His expertise is working with teams to identify and manage sustainable goals. He has served as an advisor to the California Division of the State Architect where he participated in the development of the CalGreen Building Code and was a founding member of the California Sustainable Building Task Force.

James Becker is a Licensed Mechanical & Fire Protection Engineer with 27+ years' PM/ CM experience, including project and facility planning; smoke control inspection; operation and troubleshooting HVAC, energy management and lighting control systems. He is an ACG Certified Commissioning Agent, Commissioning Process Authority Professional, Energy Management Professional, and LEED Accredited Professional.

**Owners and Professionals from all sectors of
the construction environment would benefit.**
