# WHOLE BUILDING COMMISSIONING

## The Big Picture - *It's more than M/E/P*

Done correctly, the whole building commissioning process integrates throughout the life cycle of design, construction, and operation of a building, and involves daily activity during design and construction, creating an invaluable resource during occupancy, for the life of the building. Rather than focusing on just M/E/P aspects of a building, whole building commissioning addresses the myriad of systems that combine to make a successful facility.

We Identify roles and responsibilities of all participants in building design, construction and operation that assure both project success and significant economies for a building's entire life cycle.

**Even if you think you know commissioning basics, this eye opening session will enhance your ability to specify, participate in and enjoy benefits of whole building commissioning.**

**Who benefits:** Owners, Facility Directors, Architects, Designers, CMs, PMs, Engineers, Commissioning Agents, Estimators, Contractors, Subcontractors, Inspectors, Contract Administrators and more...

**PRESENTERS:**

**Lyn L. Gomes**, P.E., CCP, LEED AP, CLCATT, is Commissioning Team Lead for kW Engineering. Her 15 years of combined experience in lighting controls and HVAC design, construction, and startup, make her a triple talent in the commissioning world. Lyn strives for persistence in energy efficiency, working diligently with project teams to maintain quality while finishing on-time/budget. Lyn is a board member of **Building Commissioning Association** California chapter, chairs the BCA conference, and serves on the industry advisory board of Techbridge, an afterschool STEM program for girls.

**Larry Eisenberg**, Principal, Ovus Partners 360, has extensive background in building construction, sustainability and renewable energy. He has participated in the design and construction of hundreds of buildings as an owner's rep. While Associate VP of Physical Planning and Development for University of Wisconsin in the 1980's, Larry worked with faculty/colleagues at UW-Madison to help develop and implement the concept of building commissioning. Today building commissioning is recognized as a critical tool to assure quality in construction and long term building value.
